1882.

PREFACE.

In preparing the present edition of our Seed Catalogue, our desire has been to give a selection of the most choice flowers, avoiding the long list of names usually given in catalogues, a great part of which are of no value in our climate; whilst a still larger portion are nothing better than weeds. A writer in that excellent paper, "The Garden," (London,) makes some timely remarks on these long catalogues of names in Europe. The writer says: "I see several species of orchid seed offered by the ounce in Germany as though they were commonly grown, but they must be put in principally to swell the catalogues, like many other things. What a marvellous publication is the seed list of a great German firm! I am sure there are more than 10,000 species and varieties in one I received lately. Where do they all come from, and what becomes of them all? Sixty distinct classes of asters, and other florist flowers in like proportion; 1,500 species of hardy perennials, many of which I venture to say are not found in five gardens in Europe, if in any. How many of these are worth growing, even in the largest gardens, and how many of them represent nothing but a name? These questions no one can answer, though they may lead to some interesting reflections."

Having been engaged over thirty years in growing and harvesting seeds—flower and vegetable—we flatter ourselves we can safely select the finest varieties, and such as cannot fail to please amateur cultivators, as it is very difficult for an inexperienced person to select from the long lists usually given. Being extensively engaged in importing and growing the new and rare plants and florist flowers, it will be readily seen that our facilities for saving seed of the choicest description are unsurpassed; the seeds are of a quality which growers alone can offer. Whilst such articles as it is necessary to import are received direct from the first growers in England, France and Germany.

Please make out order for Seeds and Plants on separate sheets.

This Catalogue annuls all former prices.

CULTIVATION.

Flowering plants are from various parts of the world—temperate and tropical—and their habits are as various. Some are found on mountains, others in rich moist valleys, and again on arid plains; it follows that their treatment must be very dissimilar, and that it is not in the province of a catalogue to give any lengthened cultural directions. We will only offer a few general remarks on seed sowing.

In this latitude (Washington) nearly all the Hardy Annuals can be sown in April, say from first to middle, considering the season and the condition of the ground; whilst the more tender varieties—natives of warmer climates—should not be committed to the ground before the middle of May. Such tender plants as Double Zinnias, *Clianthus Dampierii*, Cypress Vine, &c., should not be sown before the latter season, as they are natives of warm climates, and when sown early, and the ground cold, they frequently perish. When this occurs, the blame is of course placed on the seedsman; when, had they been sown in proper season, success would be certain.

HARDY PERENNIALS—The common and large seeded kinds may be sown in the open borders any time in April, but the rare and more delicate species will succeed with greater certainty if raised in a closed frame, with or without bottom heat; thus treated, nearly all will flower the first season if sown early and planted out the early part of May. All those with very small seeds should be sown under glass. Amateurs will do well to bear in mind that though many Perennial seeds vegetate as quickly as those of Annuals, there are some others which usually remain dormant for weeks and even months; to this class belong the Cyclamens, Pæonies, *Fraxinella*, &c. Our native Perennials are best sown in Autumn, or as soon as gathered, and they will then vegetate the following spring. As this is not always practicable, the plan of steeping the seeds before sowing, for twenty-four hours, may be adopted with great advantage in many cases. Half-hardy Perennials require the same treatment as hardy Perennials, differing only in their need of winter protection.

Green-house and hot-house Seed need a moist, warm temperature, such as the propagating-house or hot-bed frame. All seeds sown in frames or houses require shading, in bright weather, during the middle of the day, especially as spring advances. For all seeds sown in pots, under glass, a compost composed of well-decomposed leaf mould, sand and sandy loam, will answer very well. Sow very thinly; cover the seeds with about its own thickness of soil. After germination has once commenced, the surface of the soil, on no account, should be allowed to become dry. Very small seeds, such as *Mimulus*, *Lobelia*, *Calceolaria*, &c., should not be covered with soil, but be sprinkled thinly on the soil, which should be previously watered from a fine rose. Chinese *Primula* germinates best when covered with a layer of damp moss; this seed often fails to grow from being too deeply covered with soil, and many other failures are attributable to the same cause.

A writer in the "Garden," London, makes the following remarks on the germination of seeds: "I have, at the present time, two kinds of shrub seeds, just appearing above ground, that have been sown, as nearly as possible, two years. In the ordinary course of affairs, many people, not understanding their nature, would have thrown them away at least eighteen months ago and blamed their seedsman for sending them bad seeds. *Primula Japonica*, if kept till spring, or until it has become thoroughly dry, will not germinate for at least a year, and sometimes two; and the same holds good in the case of many hardy plants."

All Flower Seeds Sent by Mail, Postage Free.

For the convenience of persons unacquainted with plants, we have, for some years, put up the following collections, which are varied to suit different latitudes; among which are seeds of our own finest strain, which cannot be excelled; they have invariably given the greatest satisfaction.

Beautiful New and Rare Plants.

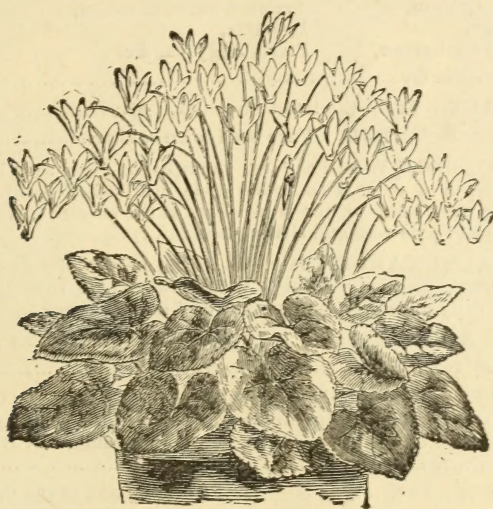

per pkt.

ASTERS (CHINA). New Lilliputian Crimson.....	\$ 0 25
Rose.....	0 25
White, carmine centre.....	0 25
White, rose centre.....	0 25

The above are exceedingly beautiful new Asters.

ASTERS (CHINA). New Shakespeare, or very dwarf pompon, very beautiful colors, mixed.....	0 20
ASTERS (CHINA). Half dwarf multiflora, finest.....	0 20
AQUILEGIA CHRYSANTHA. This is unquestionably one of the finest Perennials. Its large golden yellow, long spurred flowers are produced in great abundance from densely tufted plants which maintain a long succession of blooms.....	0 05
AQUILEGIA CHRYSANTHA CÆRULEA. A seedling from the above, raised in our nursery. A counterpart of the last with flowers of a beautiful blue.....	0 10
AQUILEGIA WITTMANIANA. This is a remarkably fine new species with very large purplish blue flowers—the finest of all Aquilegias.....	0 10
ANASACANTHUS WRIGHTII. A new plant which I have received from Texas. A shrub attains a height of four to five feet, bushy, flowers orange, a continuous bloomer, nearly or quite hardy.....	0 50
TUBEROUS ROOTED BEGONIAS. These novel and beautiful varieties will be found admirably adapted for the summer and autumn decoration of the greenhouse and conservatory; for they produce in the utmost profusion magnificent flowers of very large size, and great variety in color. The tubers rest during the winter months, similar to Gloxianas, and can be easily re-started into growth in the spring. Their profuse flowering quality, and the charming variety of color of their blossoms, renders them extremely showy and effective. Saved from our rich collection.....	0 25

		per pkt.
CALENDULA METEOR.	The flowers of this new variety are large yellow, striped with bright orange, very desirable.....	0 10
CARTERS' NEW CLARKIA, "MRS. LANGTRY."	A novel and exceedingly beautiful form of Clarkia. The petals have an even edge (<i>i. e.</i> , are wholly petalled), the color of the flower being purest white with an evenly defined disc or centre, of brilliant carmine crimson. It is remarkably free-flowering, of dwarf compact habit.....	0 50
CANDYTUFT DOBBIES' WHITE SPIRAL.	Very remarkable for its vigorous growth and large pure white bloom, forming a very compact spike like that of the old White Rocket, measuring from 4 to 6 inches in length and 2 inches in diameter.....	0 15
CLEMATIS—JACKMANII STRAIN.	The seed offered was saved with care from our magnificent collection of these lovely climbers.	0 25
COLEUS.	This has been saved with care from our rich collection, which embraces all the fine new American varieties, as well as European.....	0 10

CYLAMEN PERSICUM.

CYLAMEN PERSICUM—	Very fine strain mixed.....	0 25
	Album—white.....	0 25
	Atrorubens—dark red.....	0 25
	Giganteum, much larger than Persicum, fine mixed.....	0 50
	White and Purple, separated colors.....each	0 50
NEW JAPANESE DIANTHUS—EASTERN QUEEN AND CRIMSON BELLE.	These beautiful forms of the popular <i>D. Heddeggii</i> are most distinct and pleasing. Eastern Queen is beautifully marbled, the broad bands of rich mauve upon the paler surface of the petals are very striking and pretty. Crimson Belle—as its name implies—is of a rich vivid crimson lake color; flowers of extraordinary size and substance, evenly and finely lacinated. Both varieties come perfectly true from seed.....each	0 25
DAHLIAS.	Our collection of this magnificent flower is unsurpassed in this country or Europe. Saved with care, mixed	0 20
DRACOCEPHALUM RUYSCHIANA, VAR. JAPONICUM	—“This is a hardy herbaceous perennial, 18 to 24 inches in height, branching from the base. The violet blue flowers, $1\frac{1}{2}$ inch in length, are in terminal verticillasters, intermixed with numerous obovate acuminate leafy bracts. It is a very pretty and effective herbaceous plant, and one well adapted for bedding out. We strongly recommend it to all lovers of hardy plants	0 50

	per pkt.
ERYSIMUM PULCHELLUM. A dwarf spreading plant, very hardy, covered with an abundance of yellow flowers in the early spring and during summer.....	0 10
ESCHSCHOLTZIA MANDARIN. A distinct variety; the outer side of the petals brilliant scarlet, the inner side rich orange; very brilliant in color, and most desirable.....	0 25
ESCHSCHOLTZIA CROCEA FLORA PLENO. "This is one of the grandest novelties that has come under our notice for many years. A beautiful bright orange scarlet, shading off to salmon red color. The flowers are very double and of great substance, the appearance of the plant in growth being particularly distinct and charming. It is quite as hardy as E. Crocea, and the flowers are produced in the greatest profusion.....	0 25
FERN. Spores of the finest species, viz:.....	0 20
Adiantum Gracellinum, Amabile,	
Peruvianum, Cuneatum,	
Trapeziforme, Concinum Latum.	
Veitchii, Asplenium Longissimum,	
Macrophyllum, Pellea Andromedæfolia,	
Princeps, Lomaria,	
Sanctæ Catharinæ, Pteris Argyrea, &c.	
Collection of 14 varieties for.....	1 50
GERANIUM ZONALE. From the latest novelties, Mixed.....	0 25
APPLE SCENTED. Pure seed, own saving.....	0 25
GODETIA, "PRINCESS OF WALES." A remarkable vivid and brilliant form, possessing great depth of color with remarkable neatness of habit. The flowers are of a charming ruby crimson, the outer edges of the petals pencilled and shaded with a soft mixture of pale rose and silver grey.....	0 15
GODETIA LADY ALBEMARLE. It grows to the height of 1 foot, forming nice shrubby little plants, profusely covered with flowers of a rich glossy crimson; each flower when fully expanded measures over 3 inches across.....	0 10
IRIS KAMPFERI. A beautiful hardy Japanese Iris.....	0 15
SIBERICA. Mixed.....	0 15
SWEET PEA VIOLET QUEEN. It is dwarfer in habit than the other varieties, and the seed is also quite distinct in appearance. the flowers ranging in color from deep mauve of the keel to light violet of the guard petal, suggestive of the beautiful Bougainvillea.....	0 10
PANSY (OR HEARTSEASE). The seed offered is from one of the finest collections in England. A magnificent strain of fine varieties, producing large, handsome flowers of great substance and variety of coloring.....	0 50
PANSY (OR HEARTSEASE). Very fine mixed, from a choice English collection,	0 25
PANSY, FANCY. Nothing can exceed in beauty and attractiveness these Fancy Pansies. "Flowers are large and of good substance, they have a bold quaintness and marvellous variation of color," "Fancy Pansies are the most free in growth and most gorgeous in color—gorgeous but not gaudy, for many of them are extremely chaste." Extra selected.....	0 50
Very fine Fancy Pansy.....	0 25
NEW HYBRID VIOLA, OR BEDDING PANSY. (MIXED). "This is an entirely new strain of Viola from anything hitherto introduced, and consists of the Viola with all the well defined markings of the Fancy Pansy, from deep black to bright bronze, and striped and spotted in an extraordinary manner,".....	0 50
Very fine selected Viola.....	0 25
Striata Perfecta. Improved striped and variegated kinds of great beauty.....	0 50
PETUNIA HYBRID GRANDIFL. SUPERBISSIMA. The flowers of this new class of Petunias are of a remarkable size, very regular in shape, with a large open centre, making it quite distinct from the others.....	0 50
PETUNIA GRANDIFLORA ALBA. Very fine variety, with large pure white flowers.....	0 25
Double, finest (mixed) new. Very finest strain.....	0 50
Double, large flowering, (new.) Very finest strain of large double flowers.....	0 50

per pkt.

PHLOX DRUMMONDII GRANDIFLORA. A splendid strain of large flowered	
varieties, mixed.....	0 10
Grandiflora splendens, (new), flowers large bright, with white centre.....	0 15
Meteor, (new), large flower, bright scarlet	0 15
Rosea Alba Oculata, large and fine	0 15
violet, (new), large, with white centre.....	0 15
white, (new), large, pure white.....	0 15
dwarf crimson, (new), large extra.....	0 15
From the finest strain cultivated of this beautiful flower.....	0 15

**PHLOX D. GRANDIFLORA.**

PRIMULA SINENSIS. Rich Magenta, a very beautiful and bright Primula—not fringed.....		0 50
Fimbriata—Fine Magenta, a bright and beautiful flower.....		0 50
Rosy Purple, very rich color, distinct and beautiful.....		0 50
Very bright red—a magnificent flower.....		0 50
Alba, finest strain.....		0 50
Rubra, do.		0 50
The above are our own saving and unequalled by any offered.		
Double mixed. Imported, a fine strain.....		1 00
SENECIO PULCHER. A pretty plant, with rosy-crimson flowers, very showy, flowers late in summer.....		0 50
SALVIA GREGGII. (New.) A pretty new species which I have just introduced from Texas. This has long spikes of rosy purple flowers; a continuous bloomer, very compact habit, and nearly or quite hardy in this latitude.....		0 50

- TORENIA FOURNIERI.** A very fine new annual, with large sky blue flowers, having three large spots of a dark indigo blue, and a bright yellow stain in the centre of the flower. Continues blooming during summer and autumn..... 0 10
- TORENIA BAILLONII.** A very beautiful and distinct species from Cochin China, bearing bright yellow flowers with a purplish brown tube, similar in habit to *T. Asiatica*. Continues flowering during summer and autumn..... 0 20
- WALLFLOWER, EXTRA FINE DARK.** Our selected strain of this very beautiful and useful flower can be highly recommended. It blooms very early in the season and produces fine large flowers, of good substance, while the color is all that can be desired..... 0 10

Celosia Huttonii,

I have no hesitation in saying that this is one of the best bedding-out plants ever introduced. The greater the drought and more intense the heat, the brighter are the colors of this lovely plant. The upper surface of the leaf is of a bright deep claret color, whilst the under is of a bright crimson shade; by its side the colors of *Iresine* and *Coleus* look dingy. Flowers in spikes, small bright crimson..... 0 15

patens, beautiful rich blue.....	10

SELECT VEGETABLE SEEDS.

In offering to the public my stock of garden seeds, I do so with great confidence; all are new, fresh and of the finest description. Special attention is given to the selection of such varieties as succeed best in the Middle and Southern States, which from my long and extensive experience, I can select with confidence. Such varieties as are best grown in this country, are either grown by myself, or by experienced growers, by contract for my trade; whilst those varieties it is necessary to import, I receive from the most reliable growers in England and the continent. All garden seeds by the ounce will be prepaid by mail—when $\frac{1}{4}$ lb. and upwards are ordered, 16 cts. per pound and 25 cts. per quart, must be added for postage. As well as on all articles marked thus *; when this is omitted an amount equivalent to the postage will be deducted from the order. Orders to the amount of \$10 and over will be prepaid to any express office within 1,000 miles of Washington. This applies to seeds at catalogue rates by the ounce or pound, not to heavy seeds by the peck or bushel, and not to plants, trees or other articles. *No discount on Vegetable Seeds.*

Campanula Medium Calycanthema Alba,
Pure White.

Campanula Medium Calycanthema Cœrulea,
Dark Blue.

Campanula Medium Calycanthema Lilac.

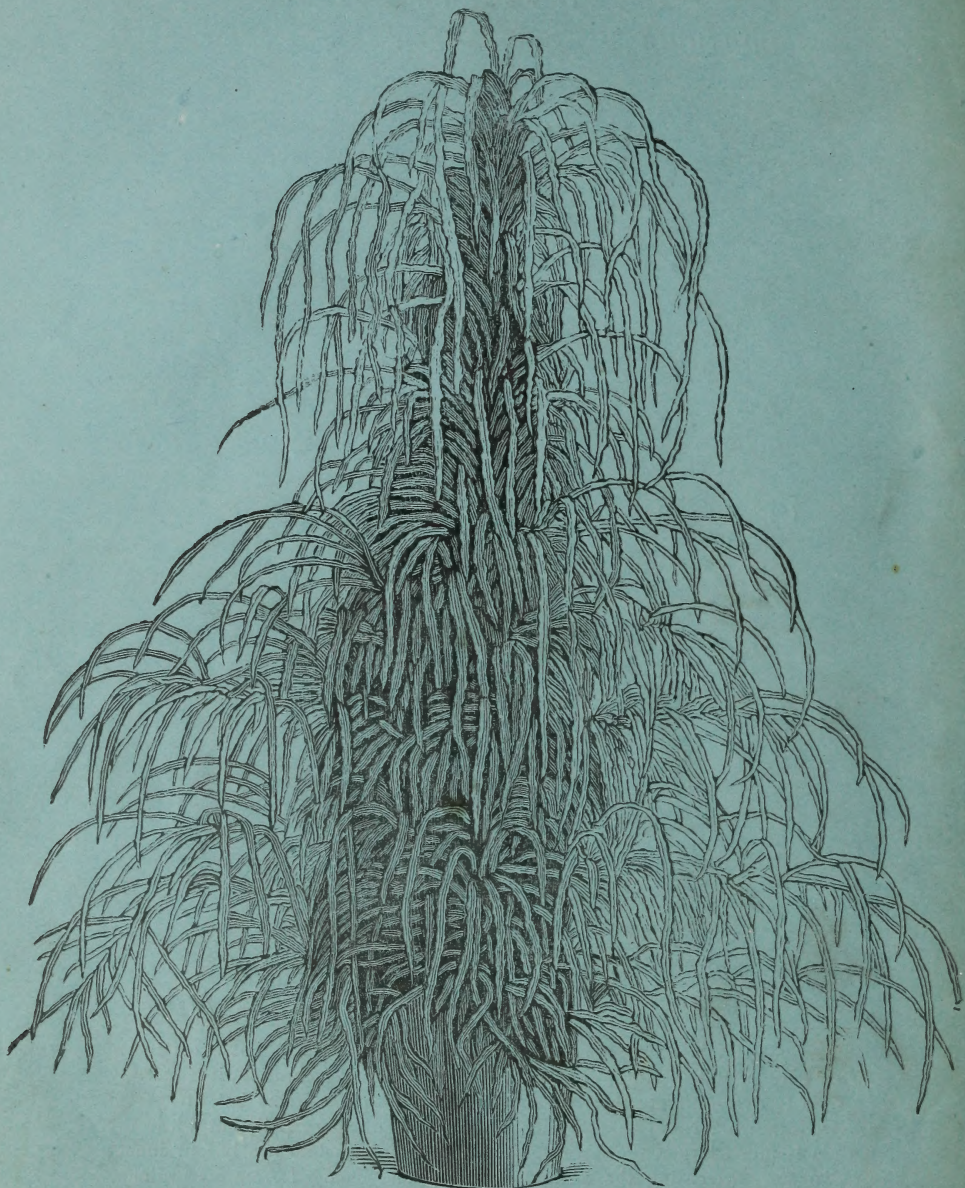

These splendid biennials are almost unrivalled for their brilliant effect in the flower garden, and as single specimens for conservatory decoration, it is scarcely possible to over-estimate their value. In habit the plant differs but little from the well-known form of the old blue and white Canterbury Bell, but while the corolla is much larger, the calyx, in addition, is enlarged to nearly four inches in diameter, presenting the form of a saucer, and changed from its ordinary green color to the same as that of the corolla, thus adding considerably to its beauty. The fact of its coming true from seed renders it easy of access, placing it within the reach of all amateurs and lovers of their garden.

Price per packet of each variety 10 cents.

AMARANTHUS SALICIFOLIUS.

This very beautiful and graceful plant has given universal satisfaction, having succeeded better—developing its beauty more fully—in our warm climate than it was found to do in the cooler climate of England.

The leaves, which are beautifully undulated, vary in the earlier stages of growth, from a green to a bronzy-green shade. As the plants get stronger the leaves, at the ends of all the principal branches resume a bright orange red color, and become more elongated, generally being 10 to 15 inches in length, forming magnificent bright colored plumes, and giving the plant a most elegant and picturesque appearance. **Price per packet 5 cents.**
